***What people are saying
about Mark Hordes...***

"Mark, I stayed an extra day at the conference in order to hear what you had to say. I can tell you I was not disappointed. Your insights into the problems that organizations face as they try to move from a product-centric to a services-centric orientation were both interesting and thought-provoking. I readily identified with the examples you noted and will use the self-assessments tools you provide as a way of carrying this message to my company, as we refine and develop our services strategy."
